SAFETY AND QUALITY

Health and safety

Incorrect assembly/installation may damage the keg spear and poses the risk that components may occasionally come off during initial pressurization and can cause harm to product and person.

Quality

Specialised sealing systems made of high-grade materials are in daily utilisation with all our types of extractor tubes. Due to continuous improvement of our technology, we are able to equip all S-type and D-type systems with a five-year warranty.

LIST OF CONTENTS

1. Mounting Instruction

MOUNTING INSTRUCTION

EXTRACTOR TUBE ET-W D / ET-W DB / ET-W B

1. Mounting Instruction

ET-W D

ET-W DB

ET-W B

MOUNTING INSTRUCTION

EXTRACTOR TUBE ET-W D / ET-W DB / ET-W B

Fig. 01

1. Moisten the extractor tube with water.

Fig. 02

2. Check the keg neck is clean. Clean the keg neck from any contaminations.

Fig. 03

3. Check the sealing ring is not damaged and is positioned correctly.

MOUNTING INSTRUCTION

EXTRACTOR TUBE ET-W D / ET-W DB / ET-W B

Fig. 04

4. Check if lock/safety is O.K. Insert the extractor tube straight.

Fig. 05

5. Turn the extractor tube clockwise until it engages in the socket.

Fig. 06

6. Place the ring segment of the DSI assembly tool around the drum sleeve. Place the retaining ring on the pressure piece of the assembly tool as shown. Align the slots of the pressure piece of the assembly tool with the cams of the extractor tube housing by turning the entire tool.

MOUNTING INSTRUCTION

EXTRACTOR TUBE ET-W D / ET-W DB / ET-W B

Fig. 07

7. Press the extractor tube into the barrel sleeve by turning the handles of the assembly tools to a horizontal position.

Fig. 08

8. Insert the retaining ring into the groove of the drum sleeve. Make sure that the ring is fully retracted.

Fig. 09

9. Remove the screw-in/screw-out tool. The keg is ready for use now.

DISMOUNTING INSTRUCTION

EXTRACTOR TUBE ET-W D

2. Dismounting Instruction ET-W D

ET-W D

ET-W DB

ET-W B

DISMOUNTING INSTRUCTION

EXTRACTOR TUBE ET-W D

Fig. 10

1. Decompress the keg, e.g. by means of the DSI decompression and removal Tool.

Fig. 11

2. Place the ring segment of the DSI assembly tool around the barrel sleeve. Align the slots of the pressure piece of the assembly tool with the cams of the body by turning the complete tool.

Fig. 12

3. Press the extractor tube into the barrel sleeve by bringing the handles of the assembly tool into a horizontal position.

DISMOUNTING INSTRUCTION

EXTRACTOR TUBE ET-W D

Fig. 13

4. Use the DSI retaining ring remover to remove the ring from the groove of the drum sleeve. First remove the last coil and then the retaining ring from the groove. Turn the handles of the assembly tool to a vertical position and then remove the tool.

Fig. 14

5. Remove the extractor tube from the keg by turning it anti-clockwise and lift it up.

DO NOT USE THE RETAINING RING AGAIN!

DISMOUNTING INSTRUCTION

EXTRACTOR TUBE ET-W DB / ET-W B

3. Disassembling instruction

ET-W D

ET-W DB

ET-W B

DISMOUNTING INSTRUCTION

EXTRACTOR TUBE ET-W DB / ET-W B

Fig. 15

1. Decompress the keg, e.g. by means of the DSI decompression and removal Tool.

Fig. 16

2. Place the tool for retaining ring removal flat on the drum sleeve with the handles open (against the retaining pin). Turn the tool until the opening of the circlip is visible through the curved slot. (see Fig. 09)

Fig. 17

3. Close the handles up to the retaining pin. The right-hand side of the retaining ring rises. With the handles closed, turn the entire tool approximately 270° clockwise until the circlip comes out of the barrel sleeve.

DISMOUNTING INSTRUCTION

EXTRACTOR TUBE ET-W DB/ ET-W B

Fig. 18

4. Open the handles (up to the retaining pin).
Remove the tool from the barrel sleeve.

Fig. 19

5. Remove the extractor tube from the keg by turning it clockwise and lift it up.

DO NOT USE THE RETAINING RING AGAIN!

DISASSEMBLING INSTRUCTION

EXTRACTOR TUBE ET-W D / ET-W DB / ET-W B

4. Disassembling instruction

ET-W D

ET-W DB

ET-W B

DISASSEMBLING INSTRUCTION

EXTRACTOR TUBE ET-W D / ET-W DB / ET-W B

1. Put the extractor tube in the tool. Make sure that the three pins of the tool fit into the three holes in the bottom of the extractor tube.

2. Pull the handle forward to compress the spring. Push the safety latch slightly inwards. Pull the body downward and turn it anti-clockwise until it is unlocked.

3. Move the body upwards and connect it to the tool by turning the body 90°.

4. Push the handle backward. Take the subassembly out. Take the body off.

5. Take off the remaining parts. The extractor tube is disassembled.

DISASSEMBLING INSTRUCTION

EXTRACTOR TUBE ET-W D / ET-W DB / ET-W B

1. Press the tube with the seal onto the disassembling tool and press the ball inwards.

2. Pull the tube in a lateral direction until the seal is released from the tube.

The seal must be replaced after this process!

3. The ball and spring can now be removed from the tube.

ASSEMBLING INSTRUCTION

EXTRACTOR TUBE ET-W D / ET-W DB / ET-W B

5. Assembling instruction

ET-W D

ET-W DB

ET-W B

ASSEMBLING INSTRUCTION

EXTRACTOR TUBE ET-W D / ET-W DB / ET-W B

1. Replace the sealing ring on the body and the main seal. Assemble all parts.

2. Connect the body to the Assembling Tool. Put the subassembly in the Tool. Push the safety latch slightly inwards.

3. Pull the handle forward to compress the spring.

4. Pull the body downwards and turn it clockwise until it is locked to the Extractor Tube Plate. Make sure that the safety latch sticks through the big opening in the body.

5. Push the handle backward in order to tension the spring and take out the extractor tube. Please check the correct positions of the seals and the safety latch.

TOOLS
